COLLECTION

COLLECTION

New creation for better space value

The value of a product that is made directly with the techniques and knowhow of Bestuhl is highest when the product is both an expression of beauty in the work space and of the user's ultimate comfort. The value of the product goes beyond the sum total of time spent and techniques used to complete an individual product and goes to the heart of the Bestuhl ethos. Experience directly this ethos of the beauty and comfort of various designs, colors and textures those brought to you by Bestuhl.

be the best,
bestuhl

BEST QUALITY

for Everywhere

The depth and breadth of our experience allows for the manufacture using many unseen components. We insist on a persistence about high quality that is based on long employed and trusted techniques. It is also based on systems that form the foundation of Bestuhl. These elements are seen and found throughout Bestuhl's quality products everywhere. Bestuhl insists on constant research of users' changing physiques and their ever-changing work environments. These are consistently demonstrated by products that must pass the essential demands of the production process and quality control. Quality is paramount at Bestuhl.

EXCELLENT DESIGN

for Comfort

Bestuhl seeks to create practical designs that fit integrate smoothly with the function of work spaces. Designs that understand people's physical and work environment needs suggest new, functional and practical styles of design to the Bestuhl teams. We strive for integrated solutions that enhance the utilitarian value of an environment. The design solutions that Bestuhl shows go beyond visual beauty. A new product's design solution becomes a medium to communicate intimately with the essence of a workspace. Bestuhl shares this philosophy of design with people who empathize with us and wish to experience it.

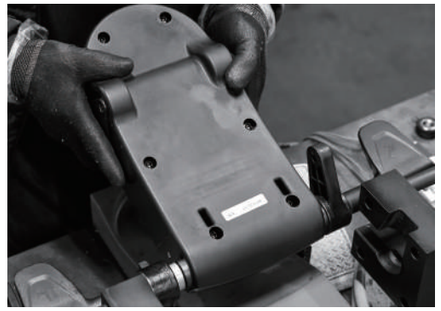
PINUP

K-DESIGN AWARD'18 GRANDPRIZE

CRAFTS-MANSHIP

for Value

The product that one most often uses in a given work environment, leaves with more of it as well: experience, long tried and tested experience. The impression an environment leaves on one is of a beautiful design. Like a chair that conforms so naturally to one's body. Or like the desk that impresses on one the beauty of a design that blends so well with its environment. The true value of a product is expressed through its excellence of design and its durability. Through its spirit of creative in-house craftsmanship, Bestuhl studies and produces key components directly. Bestuhl actively develops and produces products that present the ultimate user experience while maintaining the highest levels of quality.



GLOBAL STANDARD

for Trust

Bestuhl isn't satisfied with just the strength of its quality. Bestuhl has created its own specialist technical skills. Bestuhl produces only products that have passed the strictest quality control standards and met the highest professional tests. Bestuhl is in accordance with all manner of global standards tests such as Greengard, BIFMA, EN 1335 certification, among many others. Bestuhl is globally competitive and ranks with the world's best with dynamic, unsurpassed quality products.

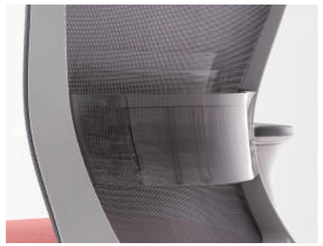
S10

The curves of this chair that started from an ergonomic design promote back health. The S10 reacts flexibly with the user's various movements and maintains a comfortable sitting position by use of custom controls.

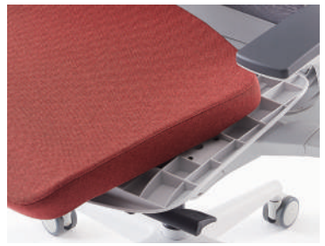
SINGLE - TOUCH, ADJUSTABLE LUMBAR SUPPORT

Regulation of the height and depth of lumbar support works with just one touch. With a simple method of operation, it makes the best back support possible in a way that suits the user.



SINGLE TOUCH, REMOVABLE SEAT FUNCTIONS

With only one touch, the seat pad can be removed easily and conveniently to avoid disfiguration by use of other unwanted users. The other function is to be able to change fabric color simply.



ADJUSTMENT OF SEAT DEPTH

Control of the depth of the seat in view of the various users' body types and movements of position enables a reduction of the effects of pressure on the thighs and maintains optimal comfort.

S15

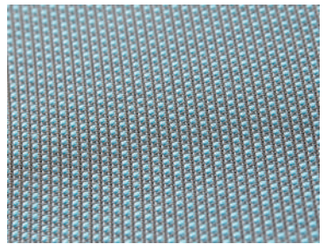
This model's gentle curves connect with the user's body shape and it holds the user upright and in a correct sitting position. The seat angle, elasticity, etc. can be adjusted variously by the user's working environment and body type.

ADJUSTABLE SEAT ANGLE

Control of the seat angle in accordance with the user's comfort promotes a healthy back and helps keep the user in a correct sitting position.

DOUBLE ELASTOMER MESH

Use of a mesh that incorporates highly elastic thread in both the weft and warp gives excellent elasticity and durability.



SEAT MESH ELASTICITY CONTROLS

The elasticity of the mesh can be freely controlled by the user's position and taste. The user can control the pressure of the seat through its adjustable surface tension to find optimal comfort.

The curve of body lines connect fluidly to the chair surface and these positions are held comfortably. Chair height and seating angle can be controlled freely to suit different physiques and can be adjusted further by the user's various leanings and weight distribution.

SYNCHRONIZED TILT

The backrest and seat can each be moved to different angles or in tandem to keep comfortable settings although both parts of the chair can take various positions.

LUMBAR SUPPORT OPTIONS AVAILABLE

The lever option controls the elasticity of backrest mesh and the pad option offers waist support by implementing control of both height and depth.

3D DESIGN

The design sensuously harmonizes a 3D dynamic face with dynamic lines that stand out visually. The lines of this innovative product seem to suit any and all environments.

The surface design of the chair allows it to respond naturally and optimally by adjusting to movement and changing posture. Excellent air permeability of the porous mesh all throughout to the seat and back provides a consistently pleasant working environment.

ALL MESH TYPE

This model incorporates an excellent elastic mesh on the backrest and seat allows for comfortable sitting for extended periods and cushions user movement.

INTERNAL TYPE OF SUPPORT

The hidden support of the mesh used in the seat reduces sagging of the mesh even when used for long durations. This flexible material also provides support for movement of the thighs and legs without causing irritation.

Neat, clean design and color key points in the workspace create an image and ambience of comfort.
A variety of utilitarian functions, like synchronized tilting and lumbar support, allow the user to find all possible positions of comfort.

INTERNAL
LUMBAR SUPPORT

The lumbar support is built into the backrest pad. Lumbar support is also controlled by adjustable height and depth of the backrest.

MULTI - LOCKING
BACKREST POSITION

By using a handle on the left side beneath seat and leaning back, a wide variety of recline angle settings can be fixed. They can then be returned to if they were previously changed by another user.

SPECIFICATION

* All specifications are made up of white and black frames.

S30
S35

The correct seating position and an organized space enhance the working experience. Even while sitting for long periods of time, the simple design and the porous, ventilated mesh of the back leaves one with a more comfortable experience.

NO FRAME TYPE MESH SEAT

With no front frame throughout and its open type structure, the user stays comfortable. This is because there are no areas of pressure on the thighs or the need to constantly change positions.

STRIPED MESH BACK BOARD (S30)

A two-tone striped mesh nicely vitalizes an environment visually and maximizes durability over long-term use.

S35 series

S30 series

FLEXIBLE LUMBAR SUPPORT

The lumbar support with a unique perforation pattern offsets pressure on the back and makes it possible for the user to control the height.

LOOP TYPE DESIGN

The flexible shape of the backrest and compact size make its practical design suitable in various spaces such as an office, a home etc.

SPECIFICATION

* All specifications are made up of white and black frames.

U15

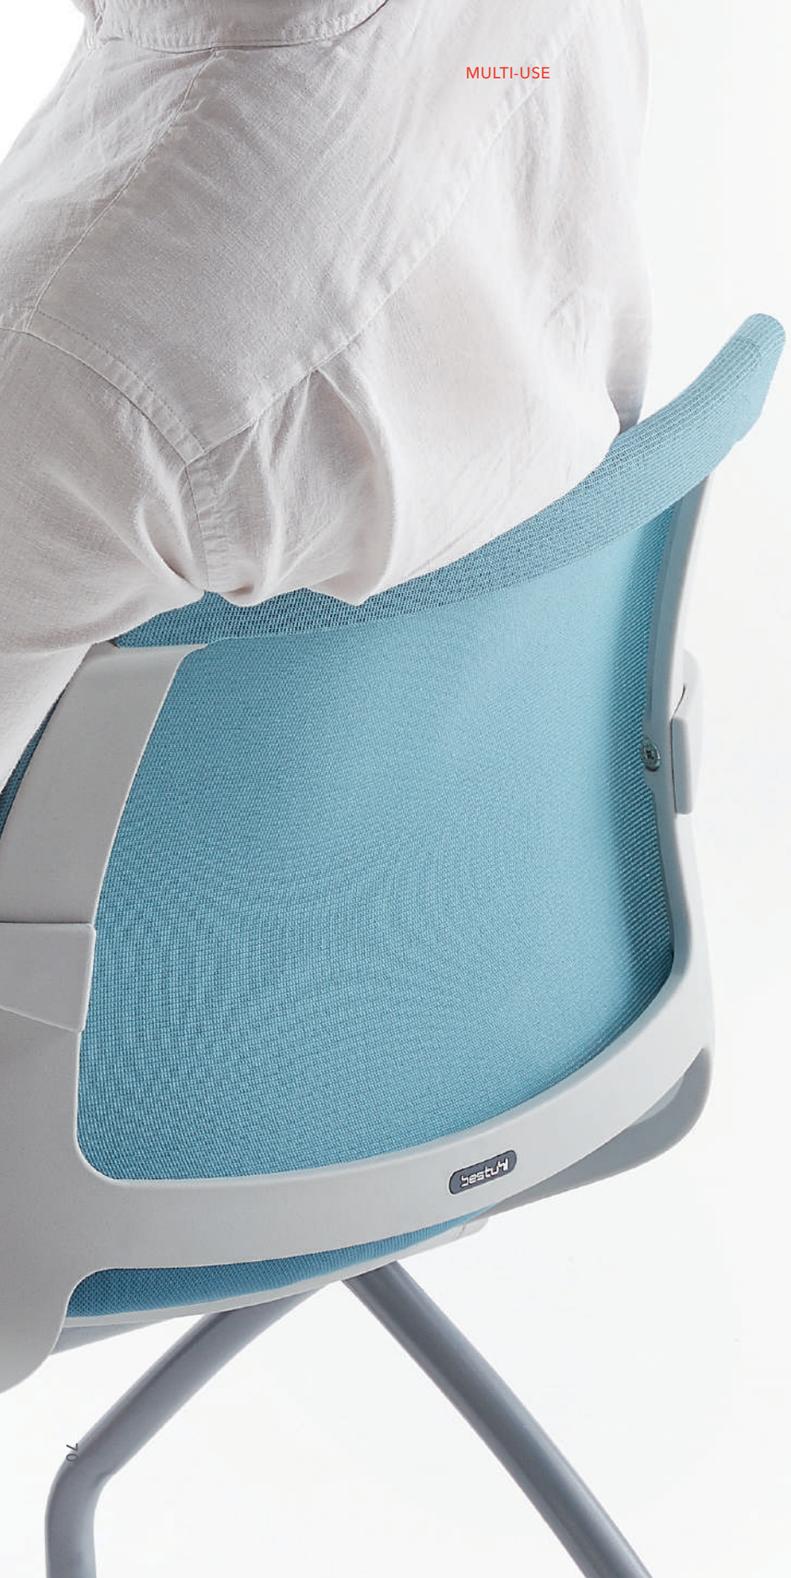
This helps to create an atmosphere of active and more productive communication. New ideas start in a casual place that consists of cheerful colors, simple designs, flexibility of tension, etc.

FOLDING SEAT

The folding function is for the seat to fold vertically and allow the chairs to be stacked easily to best utilize and manage space.

TORSION BAR

The tilting function uses a torsion bar to move the seat back when the user leans back.



TWISTING BACKREST

The entire backrest can twist to the left or the right sides when the body is leaned into one side or the other. The backrest flexes with the user's movements.

U40

Through its sheer simplicity of design, this model can be used in a multitude of settings such as meeting rooms, seminar halls, library study areas, etc. Tilting is controlled by means of the user's gentle movement. Moreover, in the interests of conserving space, it is possible to stack these chairs horizontally.

AUTO TILTING

The tilting function is achieved with a torsion bar in the backrest that is incorporated in an ergonomic line and provides ideal seating.

DETACHABLE BACK FABRIC

The back cover is easily attached and detached. Various colors of fabric covers are available to suit one's taste or the atmosphere of the workspace.

FOLDING

These chairs are easily folded and can be horizontally stacked. They are designed to keep their interlocking, compact storage. This makes for ease of moving and storage. This design's simple structure and method of storage is excellent for space utilization and is practical for use in multifunctional spaces.

COMPACT DESIGN

The sensuous design of the backrest shell fits harmoniously in a wide assortment of environments. The backrest as well as the armrests' solid design and generally emphasized fluid curves, gives solid overall body support and a generally comfortable sitting position.

I like to spend time on a Bestuhl chair.
While sitting comfortably, I realize the possibility ideas
and the possibility of their realization.
I am immersed in the purpose of achieving successful results.
Anytime you work for Bestuhl, you are surrounded by this ethic
Again, once more, I will write their greatest story.

be the best, **bestuhl**
