

Bruynzeel Office

Space for inspiration

 **bruynzeel** filing and storage

FOCUS ON CUSTOMER SATISFACTION

Our designs support your business activities

A pleasant work place is an efficient work place

Your office is more than just a place to work in. It is a dynamic environment, which, despite the limited amount of space, should inspire as well as provide the peace and quiet you need to concentrate on the job at hand. An attractive environment, where you can move around comfortably, knowing that each piece of information can be retrieved easily and conveniently. An environment where office cabinets are an important aspect.

Focus on space saving

Where efficient use of space is concerned, mobile storage solutions offer many advantages over fixed cabinets. Only one, single aisle is needed. Mobile cabinets can be moved either singly or several simultaneously, creating an aisle wherever necessary. Every square metre of business accommodation is costly. Any opportunity to save valuable space is welcome, either to create extra storage space or an extra workplace.

Focus on customer satisfaction

Customer satisfaction is our focus. Bruynzeel helps you find the ideal solution. A solution that meets the demands of your dynamic office environment efficiently and stylishly, and which has been manufactured using environmentally responsible production processes. A space saving solution, with a design and finish in harmony with your personal taste and corporate identity. Bruynzeel guarantees the high quality of its products. Thanks to their stylish, timeless design, the ergonomic and safe construction, and the extreme durability. If you are pleased with our space-saving ideas, then so are we.

Discover our creative and space-saving solutions: choose design, technological innovation, and ergonomics. Be inspired.

Bespoke design!

Focus on integration

The design of your offices is a reflection of your personal taste and corporate image. A design that is perfectly integrated in the total office concept. Bruynzeel helps you find the ideal solution. The systems can be finished in glass, steel, or wood design, in colours that complement your office interior.

Focus on identity

You can also go a step further, and choose a solution that emphasises your identity in an original manner. Integrate your logo in the wall units. Or imprint a unique image, reflecting your activities or your vision. Visual expressions that help create an inspirational working environment.

A pleasant working environment.
An agreeable atmosphere!

Focus on acoustics

If you are in the office on a daily basis, calming and tranquil surroundings are essential in order to concentrate on the job at hand. Good acoustic properties in the office environment are vital.

Bruynzeel cabinets can be fitted with specially designed panels with outstanding acoustic properties, which contribute to creating a pleasant working atmosphere.

Focus on innovation

LED lighting is a true eye catcher in your office. LED technology continues to develop rapidly. And so do our innovative concepts. Whether you choose an integrated solution, noise reducing acoustics, place the emphasis on your image, or focus on a cabinet as a modern design statement in your office. We welcome new ideas and are happy to assist you in finding the perfect solution for your office.

Compactus® Office Electro: comfort

Compactus® Office Electro: focus on comfort

Use the Compactus® Office Electro system to create extra storage space or more work stations. Thanks to the userfriendly, ergonomic, electronic operation, the system is easy to use and effortlessly moved. Just a light touch on the panel gives immediate access to the spacious interior of the Compactus® Office Electro. Even with your hands full. No problem - panel operation is effortless.

The operating functions are self explanatory and require no specific training. Vibration-free movement, thanks to 'soft start' and 'soft stop' features, ensures that all documents remain safely in place. If our daily lives are made easier by using electronics, why settle for anything less at work?

Compactus® Office Electro: focus on safety

The Motor Current Monitoring System (MCMS) safeguards the safety of users. This feature ensures that the mobiles stop immediately if another user tries to move the system while a person is in the aisle.

Compactus® Power³: comfort+

Compactus® Power³: focus on extra ease of use and secure storage

Compactus® Power³ offers all the advantages of Compactus® Office Electro and more. The intelligent electronic control of the Compactus® Power³ offers enhanced ease of use, thanks to double-sided access and the possibility of securely storing confidential information. Using programmable service tags, different aisles can be assigned to specific users or departments.

Enjoy the benefits of Compactus® Office

Compactus® Office: focus on design

The specially designed front panels can be finished in different colours, materials and designs, to blend in with your office interior.

Compactus® Office: focus on secured storage

A central locking system and sliding doors guarantee secure storage of confidential information and prevent unauthorised access.

Compactus® Office: focus on extra space

Use the Compactus® office system to create additional storage space or more work stations. Double-sided access makes the system highly accessible, which is ideal for shared storage and use in open offices. Use the lower version to increase a sense of openness. The hand wheel ensures ease of operation. The system's user friendliness is further enhanced by a convenient trolley ramp.

Sysco®: flexible and multifunctional

Sysco®: focus on flexibility

The versatile Sysco® system, available in various depths and heights, fits any office space. Thanks to its versatility, it is easily adapted to suit changing office needs. The stylish system is available as an open or closed system. Colours are applied using a powder coating, guaranteeing one hundred percent coverage.

Sysco® accessories: focus on multifunctionality

Clever multifunctional accessories increase the system's applicability. Whichever archive system you use, Sysco® can be adapted to meet your every wish and requirement.

Multi-file: focus on flexible filing

A fine example is Multi-file, which is a multifunctional suspended file, suitable for both under-shelf filing and filing in pull-out frames. Bruynzeel Multi-file offers a 3-in-1 function, with a V base, a 15-mm base and a 30-mm base all in one. The file is never any wider than its contents, saving space all round.

Side2Side: extra storage capacity, easy accessible

Side2Side: focus on extra storage capacity

Create barely visible, yet extremely effective extra storage capacity. The Side2Side system places a row of mobile cabinets in front of a row of office cabinets to create a wealth of extra storage space. At the same time occupying less wall space.

Side2Side: focus on accessibility

Documents required on a daily basis are always within easy reach. And even less frequently consulted documents are easily accessed by simply sliding the cabinet across the rails. End stops and tilt preventers guarantee safe movement. And as office requirements change, the Side2Side system is easily moved or extended.

Compactus® Office Electro

Compactus® Power³

Compactus® Office

Sysco®

Side2Side

Compactus® Office Electro
